Re: Pratyay Dutta
Curricular Practical Training

To Whom It May Concern:

It is anticipated that Pratyay Dutta, a student in F-1 status will be employed by Lawrence Livermore National Security, LLC ("LLNS") as a Student Intern in the Computing Directorate at Lawrence Livermore National Laboratory ("LLNL" or "the Laboratory") located at 7000 East Avenue, Livermore, California 94550, from June 22, 2026, through September 11, 2026 for full-time/40 hours a week.

It is anticipated that this period of training fulfills the academic training requirement and is consistent with Pratyay Dutta's degree requirements at University of California, Riverside.

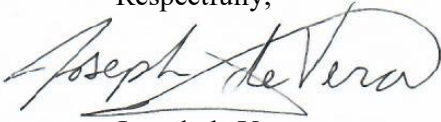

LLNS respectfully requests your assistance in authorizing Pratyay Dutta's Curricular Practical Training (CPT). In this appointment, Pratyay Dutta will develop multimodal Vision Language Models (VLMs) that better capture fine grained and relational semantic nuances, including subtle visual attributes, object relationships, and scene context, using anchoring based training and fine-tuning techniques to improve interpretability and generalization. Will perform research, implementation, and experimental evaluation of anchoring based methods for enhancing relational reasoning in multimodal representations, including a comprehensive literature review, systematic experiment design, benchmarking against state-of-the-art methods, and rigorous analysis of results. Will contribute to scholarly dissemination of results by documenting methods and findings and assisting in the preparation of a high-quality research paper for submission to a leading conference, contingent on successful research outcomes

LLNS is a limited liability corporation that assumed management of the Laboratory on October 1, 2007. LLNS was formed specifically to manage and operate Lawrence Livermore National Laboratory by entities renowned for their expertise and accomplishments throughout the Department of Energy nuclear weapons complex and beyond. The LLNS management team includes Bechtel National, University of California, Babcock and Wilcox, Washington Division of URS Corporation, and Battelle. LLNL is one of three national laboratories that are part of the National Nuclear Security Administration ("NNSA")—the others are Los Alamos National Laboratory and Sandia National Laboratories.

If you have any questions regarding the prospective employment, please do not hesitate to contact me at Joseph de Vera, devera3@llnl.gov, 925-422-9406.

Respectfully,
